Introduction

Battery Replacement guide for Oral-B White Pro 1000 **type 3756** rechargeable electric toothbrush due to faulty battery. This guide illustrates the disassembly of the Oral-B White Pro 1000 **type 3756** electric toothbrush. Use caution not to short the positive (+) and negative (-) terminals when handling the battery. This guide also requires the use of a soldering tool which reaches high temperatures. Refer to [this helpful guide](#) for some soldering and desoldering tips.

Step 1 Motherboard

- Remove the brush head by pulling the top away from the base.

 [Ask FixBot](#)

[1 comment](#)

Step 2

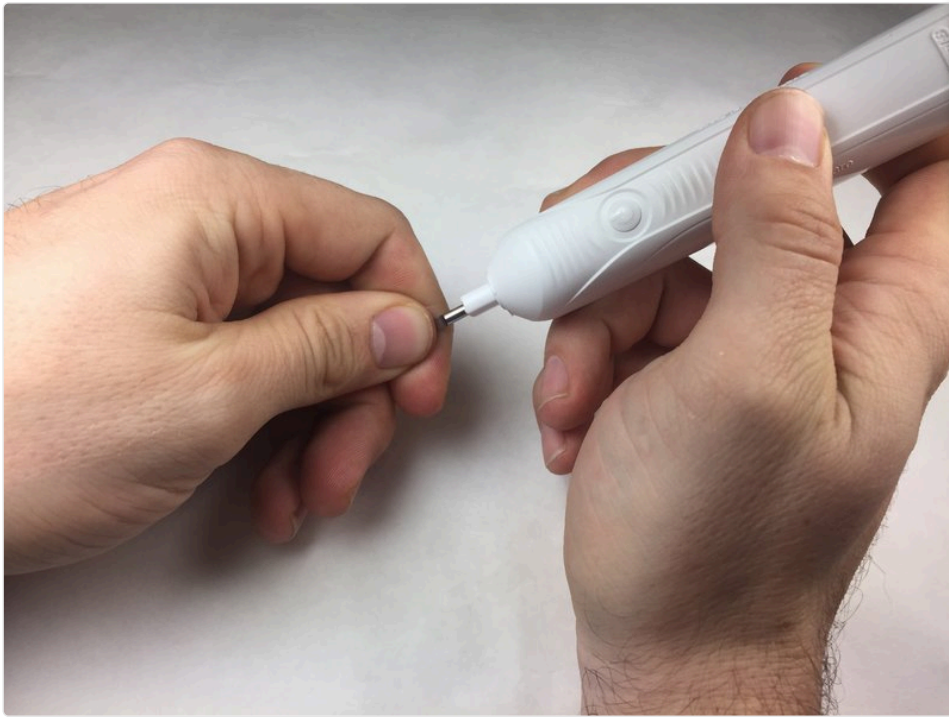

- Pry open the end cap from the toothbrush body.
- Remove the spring.

 [Ask FixBot](#)

[10 comments](#)

Step 3

- Apply pressure on the brush shaft to release the toothbrush internals.
- Remove the internals through the bottom of the toothbrush body.

This guide also works for Oral-B genius 9000. Thank You!! On mine, the coil wires was losen. Just soldered it back and works fine again.

[polken](#) - Apr 23, 2018

Same with mine: coil was loose. I guessed it because the red blinking light would not react (turn off) by putting the toothbrush on the charger. (checked also a second charger, never through away older parts, using as spare...) ;)

[Karsten](#) - Apr 29, 2020

This guide also works for Oral B PRO 2950N. Thank you so much!

I had the same issue, the coil was broken on one side, and it doesn't charge. Adding a little bit of solder to weld the broken end was enough for making it charge again

[Jacobco Ventosinos](#) - Dec 7, 2022

What type of battery is that? It's not listed under "parts."

[Andrew Rothman](#) - Oct 7, 2018

I've wrote it in another comment as well, but in case you didn't see it: As far as I know, these are **4/5 AA batteries** with about **1200 mAh** and **U-shaped solder tails**. So **the size of the battery is roughly 42x14mm** . But as mentioned in the comments, **regular AA size batteries worked in my case as well**, just had to cut the spacers in the battery retainer. AA batteries are cheaper to get obviously and most likely they'll have more capacity as well.
